

## Mobile Spill Berm Containment

Collapsible spill containment berms and pools fit easily under leaking valves, drums, tanks, storage vessels and machinery. They are quick to move and easy to place. These tanks are one of the simplest and easiest ways to contain liquids in the event of a spill.

- Meets SPCC and EPA Container Storage Regulation 40 CFR 264.175
- Chemical and acid resistant
- Custom styles and sizes for any application
- No inflation required
- Fixed, folding and foam sidewall designs
- Compact, lightweight and portable
